Figures 1-3 show a Genalex striking synchronous granddaughter clock. The dial is marked 'Made in England'. It is for a 200-250 V 50 Hz supply. The stained veneer case is 132 cm high × 28 cm wide. The dial is 13½ cm diameter with a chrome bezel, and black Arabic numerals and hands. The brand on the front, and on the back of the movement is Genalex. The clock is a rebranded Smith 'Elizabeth', date 1933. It is fitted with a Smith Type 1 striking movement, serial number 5514. To start the clock lift the starter lever and release. There is no seconds hand but a tell tale is visible through the back plate of the movement.

Rear views of the movement are shown in Figures 4 and 5. Striking is on a gong. The terminal cover is missing. Figure 6 shows a front view of the movement and Figure 7 a front view with the front plate removed. The inside of the front plate is shown in Figure 8. A top view of the movement is shown in Figure 9.
